

Music gets you talking

Remember the time when you heard a song that made you want to call someone special? Or the last time you listened to the radio and that summer track made you send a message to your friends? Music is not only a conversational topic but also sparks the desire to communicate.

Nokia offers a wide range of devices at all price points and features that make it easy to enjoy music. Like the Nokia 5800 XpressMusic whose large, vibrant colour touch screen brings music and entertainment into focus, or the Nokia 5310 XpressMusic which is ideal for first-time portable digital music users.

Nokia also introduces music services to complement the mobile device. Comes With Music is a revolutionary way for people to discover and enjoy music. People get a year of unlimited access to the Nokia Music Store catalogue with the ability to keep all downloaded tracks.

At Nokia, music is not limited to a specific group of devices as we want to give consumers a choice. In fact, music is a feature in almost all of our devices. Be it the Nokia N85 for those who embrace the latest in technology such as an in-built FM transmitter, or the Nokia 5800 XpressMusic designed for music lovers everywhere. Nokia 7610 Supernova brings music features such as a dedicated music key to fashion conscious consumers or the classic Nokia 6131 that fits music into a business suit. This comprehensive offer makes Nokia the largest manufacturer of digital music players and FM radios worldwide.

Comes With Music

Comes With Music enables people to buy a Nokia device with a year of unlimited access to tracks from a range of great artists from the Nokia Music Store. Once the year is complete, customers can keep all their music without having to worry about it disappearing when their subscription is over.

Nokia Music Store

Nokia Music Store lets people browse and buy music for the PC and compatible Nokia devices.

Manage Music

Getting music onto your Nokia device is quick and easy, with a number of transfer options available. Nokia music devices support a wide range of digital music formats including MP3, M4A, AAC and WMA meaning you can listen to your favourite music and not worry if its in the "right" digital format.

Nokia Music for PC makes it easy to rip and transfer music from PC to mobile, and to enjoy your music and playlists on your PC. In addition, you can connect your Nokia device to your PC or MAC using the USB connection, just drag & drop your music to the integrated memory or additional memory card. One thing that all our devices have in common – they are easy to use.

XpressMusic

The Nokia XpressMusic range continues to deliver affordable music and entertainment experiences with the most fresh, stylish designs on the market. The Nokia XpressMusic feature brand underlines Nokia's commitment to providing quality music capabilities on mobile devices and makes it easy for consumers to identify Nokia's growing portfolio of music-optimized devices. Each device in the Nokia XpressMusic range shares key features that ensure the best mobile music experience, including dedicated music keys, support for 3.5 mm connectors and extended battery life for music listening.

Music on the move

For those who want to have their music collection always at hand, Nokia has a wide range of products to choose from. For instance, the Nokia 5800 XpressMusic holds up to 6000 songs and includes an FM radio. In case a song makes you want to call someone, you always have the device at hand and you can even wake up with your favourite tune as an alert. A large variety of headsets by Nokia and other manufacturers such as Sennheiser and Bose are also at your disposal.

In several markets, Nokia has brought mobility to live music events. With mobile ticketing, consumers can receive their ticket directly to their mobile device making paper tickets obsolete.

Events like Nokia Trends which introduce new artists or the Nokia Theatres that host many music events are prime examples. Nokia takes every opportunity to combine music and mobility to generate a great music experience for consumers.

Nokia Music Milestones
